

# The Green Edge Compass™

*Moving forward with confidence*

**Action becomes easier when you have a clear direction.** Whether you need to build understanding, engage others, seek specialist support or take action internally, The Green Edge Compass™ will help you choose your route forward.

## Step 1: What's Having the Greatest Impact?

If you've completed The Green Edge Footprint™, use the issue that received the highest number of stars. If not, think about the environmental issue or challenge having the greatest impact on you, your organisation or community in terms of cost, resource use, inconvenience or reputation.

Now consider what is preventing you from making progress in this area. Which of the below statements feels most relevant to your situation?

- North:** I'm unsure what legislation, requirements or responsibilities apply to me.
- East:** I need more knowledge, skills or confidence before I can take the next step.
- West:** I need support, buy-in or involvement from others before I can make progress.
- South:** I understand the issue and am ready to get started.

## Step 2: Find Your Direction

## Step 3: Take the Next Step

My direction is:

---

My next step will be:

---

---

### Part of the Green Edge Framework™

If your Compass points North, East, or West, you don't need to navigate the journey alone. Bright Green Edge CIC can help you build understanding, engage others, navigate requirements and move forward with confidence.
